Alejandro Navarro García

Senior Frontend Engineer

PROFILE

Senior Frontend Engineer with 10+ years of experience building scalable, high-performance web applications for product-led teams. Strong background in React, TypeScript, and design systems, with a track record of improving conversion, performance, and developer experience across cross-functional environments.

EXPERIENCE

Senior Frontend Engineer · Bnext

Feb 2022 - Present

- Led the frontend architecture for a customer-facing banking portal used by 500k+ registered users, improving Core Web Vitals scores by 28%.
- Built and maintained a shared design system adopted by 6 product squads, reducing UI implementation time by 35%.
- Implemented feature flags, analytics tracking, and A/B testing workflows that helped increase onboarding completion by 14%.
- Mentored 4 engineers and introduced code review and testing standards that reduced frontend regressions by 22%.

Frontend Engineer · Cabify

Jun 2018 - Jan 2022

- Developed reusable React components and page flows for ride management and account features across web platforms.
- Collaborated with product and UX teams to deliver 20+ releases per quarter with consistent accessibility and responsive behavior.
- Improved bundle size by 31% through code splitting, dependency audits, and optimized asset loading.
- Expanded automated test coverage for critical journeys, lowering production bugs related to frontend logic by 18%.

Web Developer · Idealista

Apr 2015 - May 2018

- Built responsive property search and listing experiences with modern JavaScript, HTML, and CSS.
- Worked with backend teams to integrate APIs and improve client-side performance for high-traffic pages.
- Refactored legacy UI modules into maintainable components, decreasing maintenance effort and speeding up delivery.
- Supported SEO-friendly rendering strategies that contributed to improved organic landing page performance.

Junior Frontend Developer · Softonic

Sep 2012 - Mar 2015

- Implemented marketing pages and product UI features for desktop and mobile web experiences.
- Translated design mockups into cross-browser interfaces with attention to accessibility and visual consistency.
- Assisted with bug fixing and front-end refactoring efforts during a major site redesign.
- Gained hands-on experience with version control, agile ceremonies, and release coordination.

EDUCATION

MSc in Software Engineering

Universitat Politècnica de València · 2012

BSc in Computer Science

Universidad de Valencia · 2010
