

Camille Moreau

QA Automation Engineer

PROFILE

Mid-level QA Automation Engineer with 6+ years of experience improving test coverage and release confidence across web and API platforms. Strong background in automation strategy, CI/CD integration, and collaborative quality practices within Agile teams, with a focus on maintainable frameworks and fast feedback loops.

EXPERIENCE

QA Automation Engineer · Sopra Steria

Feb 2022 - Present

- Expanded automated regression coverage from 38% to 72% for a customer-facing web platform, reducing smoke test execution time by 65%.
- Built and maintained end-to-end test suites in Cypress and Playwright, cutting escaped defects in production by 30% over 12 months.
- Integrated automated checks into GitLab CI pipelines for 8 microservices, enabling quality feedback within 15 minutes of each merge request.
- Partnered with developers and product owners in Agile ceremonies to define acceptance criteria and improve testability of new features.

QA Analyst / Test Automation Engineer · Capgemini

Jun 2019 - Jan 2022

- Designed and implemented API and UI automation for a banking application, increasing repeatable test execution from 120 to 520 scenarios per release.
- Created and maintained reusable test data sets and environment checks, which reduced false failures by 40%.
- Executed risk-based testing for quarterly releases and coordinated defect triage across 4 cross-functional squads.
- Reported quality metrics and test progress to stakeholders, helping improve release predictability by 20%.

Junior QA Engineer · Cegedim

Sep 2017 - May 2019

- Supported manual and automated testing for a healthcare SaaS product used by over 300 client sites.
- Authored over 150 test cases and 60 automated regression checks for critical workflows.
- Validated bug fixes and performed cross-browser testing across Chrome, Firefox, and Edge, improving defect detection before UAT by 25%.
- Collaborated with support and development teams to reproduce customer issues and accelerate resolution times.

Software Testing Intern · Orange

Feb 2017 - Aug 2017

- Assisted with functional testing of an internal web portal and documented defects in JIRA.
- Prepared test execution evidence and helped standardize QA documentation for the team.
- Participated in exploratory testing sessions that identified 18 usability and workflow issues before release.

EDUCATION

Master's Degree in Software Engineering

Université Claude Bernard Lyon 1 · 2017

Bachelor's Degree in Computer Science

Université de Nantes · 2015
