Cisco Certified Network Associate (CCNA)

Ethan MacLeod

Junior Network Engineer

PROFILE

Junior Network Engineer with hands-on experience supporting LAN/WAN environments, troubleshooting connectivity issues, and assisting with network monitoring and documentation. Brings a strong foundation in Cisco networking, VLANs, VPNs, and switching/routing concepts, with a detail-oriented approach to maintaining reliable and secure infrastructure.

EXPERIENCE

Junior Network Engineer · Northbridge Financial Services May 2023 - Present

- Supported a 600+ user corporate network across two office locations and a hybrid remote environment.
- Resolved an average of 25-30 Tier 2 network incidents per month, reducing repeat tickets by 18% through improved documentation.
- Assisted with switch configuration, VLAN changes, and access port troubleshooting during planned maintenance windows.
- Monitored alerts in SolarWinds and escalated critical issues, helping maintain 99.8% network uptime.

Network Support Analyst · MapleTech Solutions Jun 2021 - Apr 2023

- Provided daily support for LAN, Wi-Fi, and VPN connectivity across 12 client sites in the Greater Toronto Area.
- Performed basic firewall rule validation and port testing, contributing to faster resolution of connectivity incidents.
- Maintained network diagrams, asset records, and change logs for over 450 devices.
- Supported office moves and equipment refreshes, including deployment of switches, wireless access points, and patch panels.

IT Support Technician · Westshore College Sep 2019 - May 2021

- Delivered frontline technical support for students and staff in a 3,000-user campus environment.
- Assisted with network jack testing, printer connectivity, and account access issues, closing 40+ tickets weekly during peak periods.
- Helped deploy and label network equipment in labs and classrooms, improving asset tracking accuracy by 22%.
- Escalated complex routing, DNS, and authentication issues to senior engineers with clear troubleshooting notes.

Technical Support Intern · Atlantic Telecom Partners Jan 2019 - Aug 2019

- Shadowed network operations staff and assisted with cable testing, rack organization, and equipment inventory.
- Documented maintenance activities and helped update IP address spreadsheets for internal teams.
- Supported after-hours change windows by verifying device status and confirming service restoration.
- Gained exposure to MPLS, VoIP, and basic firewall operations in a service-provider environment.

EDUCATION

Bachelor of Information Technology, Network Systems

University of Ontario Institute of Technology · 2021

Diploma, Computer Systems Technology - Networking

Seneca Polytechnic · 2019
