Jane Doe

Junior Backend Engineer

PROFILE

Junior Backend Engineer with experience building and supporting RESTful APIs, backend services, and database-driven applications in agile environments. Strong foundation in Python, SQL, and cloud-based development with a focus on reliable, maintainable code and clear collaboration across product and engineering teams.

EXPERIENCE

Junior Backend Engineer · Northstar Health Tech

Jun 2023 - Present

- Developed Python-based backend endpoints for patient intake and scheduling workflows, reducing average request handling time by 28%.
- Collaborated with senior engineers to refactor 12 legacy services into modular Django components with improved test coverage from 54% to 81%.
- Built and maintained PostgreSQL queries and indexes that improved dashboard response times by 35% for internal operations users.

Backend Engineer Intern · BluePeak Software

Jan 2023 - May 2023

- Implemented 8 REST API endpoints in Python and FastAPI for a subscription billing platform used by over 2,000 active accounts.
- Wrote unit and integration tests that helped catch 17 defects before release and increased CI pipeline reliability.
- Assisted with Docker-based local development setup, cutting onboarding time for new developers by 40%.

Software Engineering Intern · Vertex Retail Systems

Jun 2022 - Aug 2022

- Supported a Python service that processed order events, helping reduce failed job retries by 22% through improved error handling.
- Created SQL scripts and reports to validate inventory sync data across three warehouse systems.
- Partnered with QA to reproduce and fix backend bugs, closing 15 tickets during the internship.

Technical Support Analyst · ClearPath Digital

Jul 2021 - May 2022

- Investigated application and database issues for a SaaS product, resolving an average of 18 support cases per week.
- Documented repeatable troubleshooting steps for backend incidents, improving team response consistency.
- Escalated and tracked defects in Git-based workflows, contributing to faster turnaround on production fixes.

EDUCATION

B.S. in Computer Science

University of Washington · 2021

Associate of Science in Computer Science

City College of San Francisco · 2019
