SKILLS

- Python
- Apache Spark
- Databricks
- Snowflake
- Airflow
- Kafka
- AWS
- dbt
- Terraform

LANGUAGES

- French

Native
- English

Fluent
- Spanish

B2

CERTIFICATIONS

- AWS Certified Data Analytics - Specialty
- Databricks Certified Data Engineer Professional

Élodie Girard

Principal Data Engineer

PROFILE

Principal Data Engineer with 12+ years of experience designing and operating large-scale data platforms across cloud and hybrid environments. Strong track record in building reliable analytics foundations, improving data quality, and leading Python-driven engineering teams delivering measurable business impact.

EXPERIENCE

Principal Data Engineer · AXA France

Jan 2021 - Present

- Led the modernization of a 120+ TB enterprise data platform on AWS and Snowflake, reducing batch processing time by 48%.
- Designed Python-based orchestration and data quality frameworks that lowered critical pipeline incidents by 35% year over year.
- Mentored a team of 8 data engineers and standardized engineering practices across 4 product squads.

Senior Data Engineer · Capgemini

May 2017 - Dec 2020

- Built and maintained a cloud data lake for a major retail client, ingesting 2.5 billion events per month with Apache Spark and Kafka.
- Implemented CI/CD and infrastructure-as-code patterns with Terraform, cutting deployment lead time from days to under 1 hour.
- Delivered reusable Python ETL components adopted by 6 project teams, improving development speed by 30%.

Data Engineer · BlaBlaCar

Sep 2013 - Apr 2017

- Developed analytics pipelines for product and growth teams, enabling self-service dashboards used by 200+ stakeholders.
- Optimized SQL and Spark workloads to reduce daily pipeline runtimes by 40% while improving data freshness to under 15 minutes.
- Collaborated with data scientists to productionize experimentation datasets and feature pipelines.

BI Developer · Sopra Steria

Feb 2010 - Aug 2013

- Created reporting and integration solutions for public-sector clients using SQL Server and ETL tooling.
- Supported migration of legacy reporting assets to a more scalable data warehouse architecture.
- Improved data reconciliation processes, reducing manual correction effort by 25%.

EDUCATION

Master's Degree in Computer Science, Data Systems

Université Grenoble Alpes · 2009

Engineering Diploma, Computer Engineering

INSA Lyon · 2008
