AWS Certified Machine Learning – Specialty
Deep Learning Specialization (Coursera by Andrew Ng)

Eleanor Vance

Junior AI Research Engineer

PROFILE

Highly motivated Junior AI Research Engineer with a strong foundation in machine learning, deep learning, and natural language processing. Eager to contribute to cutting-edge research and develop innovative AI solutions. Possesses proven skills in Python and various AI frameworks, demonstrated through academic projects and professional experience.

EXPERIENCE

AI Research Intern · InnovateAI LabsJan 2023 - Present

- Developed and optimized a novel transformer-based model for sentiment analysis using Python and PyTorch, achieving a 15% improvement in F1-score over baseline models.
- Assisted in the design and execution of experiments for a reinforcement learning project, leading to a 20% faster convergence rate.
- Processed and preprocessed large-scale text datasets (over 1TB) for NLP tasks, significantly reducing data preparation time by 30%.

Junior Machine Learning Engineer · DataGenius SolutionsSep 2021 - Dec 2022

- Implemented and deployed machine learning models for predictive maintenance, resulting in a 10% reduction in equipment downtime for clients.
- Utilized Python and Scikit-learn to develop a customer churn prediction model, increasing prediction accuracy by 12%.
- Collaborated with data scientists to clean and integrate diverse datasets, improving data quality for subsequent analysis.

Research Assistant (Part-time) · University of Manchester (AI Department)Jan 2021 - Aug 2021

- Conducted literature reviews and experiments on neural network architectures for image recognition, contributing to a published conference paper.
- Assisted in data collection and annotation for a computer vision project, handling over 5,000 images.

EDUCATION

MSc Artificial Intelligence
Imperial College London · 2022

BSc Computer Science (First-class Honours)
University of Bristol · 2021
