SKILLS

Python PyTorch TensorFlow

Scikit-learn

Distributed Systems (Spark, Dask)

Cloud Platforms (AWS, Azure, GCP)

MLOps (Kubernetes, Docker, MLflow, CI/CD)

Reinforcement Learning, Natural Language Processing

Data Engineering, Big Data Technologies

Algorithm Design, Model Optimization

Predictive Modeling, Time Series Analysis

LANGUAGES

Portuguese Native

English Fluent

Spanish Conversational

CERTIFICATIONS

AWS Certified Machine Learning - Specialty

Google Cloud Professional Machine Learning Engineer

Highly accomplished Principal Machine Learning Engineer with over a decade of experience in designing, developing, and deploying robust AI/ML solutions. Proven expertise in leading cross-functional teams, optimizing model performance, and driving innovation in data-intensive environments. Specializes in scalable machine learning architectures and MLOps practices.

EXPERIENCE

Principal Machine Learning Engineer · Innovate AI Solutions Jan 2021 - Present

- Led a team of 5 ML Engineers in developing and deploying a real-time fraud detection system, reducing false positives by 15% and increasing detection rate by 10%.
- Architected and implemented scalable MLOps pipelines using Kubernetes and MLflow, resulting in a 30% faster model deployment cycle and improved model governance.
- Designed and optimized deep learning models for customer churn prediction, achieving a 92% accuracy rate and influencing retention strategies for over 5 million users.
- Mentored junior engineers and established best practices for Python-based ML development, code reviews, and testing frameworks.

Senior Machine Learning Engineer · Global Tech Insights Mar 2018 - Dec 2020

- Developed and productionized a recommendation engine that increased user engagement by 20% and conversion rates by 8% using collaborative filtering and deep learning.
- Optimized existing machine learning models, leading to a 25% reduction in inference latency and a 15% decrease in operational costs on AWS.
- Implemented A/B testing frameworks for ML features, providing data-driven insights that guided product development and feature prioritization.
- Contributed to the design of a robust data pipeline for streaming analytics, processing over 1TB of data daily using Apache Spark.

Machine Learning Engineer · DataDriven Co. Jul 2014 - Feb 2018

- Built and deployed predictive models for inventory optimization, resulting in a 10% reduction in stockouts and a 5% improvement in supply chain efficiency.
- Developed custom Python libraries for data preprocessing and feature engineering, enhancing model development speed by 20%.
- Collaborated with data scientists to implement novel algorithms for market trend analysis, providing key insights for strategic business decisions.

EDUCATION

Ph.D. in Computer Science

Universidade de Lisboa · 2014

M.Sc. in Artificial Intelligence

Universidade do Porto · 2010

B.Sc. in Computer Engineering

Instituto Superior Técnico (Universidade de Lisboa) · 2008
