Spanish B2

CERTIFICATIONS

Deep Learning Specialization (Coursera)

Marco Rossi

Junior NLP Engineer

PROFILE

A highly motivated Junior NLP Engineer with a strong foundation in machine learning and natural language processing techniques. Possesses hands-on experience in developing and deploying NLP models for various applications, eager to contribute to innovative projects.

EXPERIENCE

Junior NLP Engineer · AI Labs Italia

Jan 2023 - Present

- Developed and optimized text classification models for customer feedback, improving accuracy by 15% using Python and scikit-learn.
- Implemented a sentiment analysis pipeline for social media data, processing over 10,000 posts daily with 90% precision.
- Contributed to the development of a Named Entity Recognition (NER) system for legal documents, reducing manual annotation time by 20%.

NLP Intern · Data Insights s.r.l.

Sep 2022 - Dec 2022

- Assisted in data preprocessing and feature engineering for various NLP tasks, handling datasets up to 500,000 entries.
- Researched and experimented with different transformer models using PyTorch, achieving a 5% performance boost on a text summarization task.
- Wrote Python scripts to automate data collection and cleaning, reducing preparation time by an estimated 30 hours per project.

Research Assistant (Part-time) · University of Bologna

Mar 2022 - Aug 2022

- Supported a research project on conversational AI, contributing to the development of a chatbot prototype.
- Analyzed linguistic patterns in large text corpora (over 1 million words) using NLTK to identify key themes.

EDUCATION

M.Sc. in Artificial Intelligence

Politecnico di Milano · 2023

B.Sc. in Computer Science

University of Bologna · 2021
